

**AMENDMENTS TO THE SPECIFICATION:**

Please amend paragraph [0010] of the published patent application, as follows:

[0010] The present invention provides a lighting system including an articulating lamp frame with an open central area, support means to support a lamp adjacent the central area, a pair of substantially planar components attachable together for use by a pair of spaced apart [[binges]] hinges for relative rotation about a main axis extending between the hinges and across said central area, and where the hinges includes fixation means adapted to releasably fix the relative position of the planar components, and an extensible shade attached between said planar components.
